BETHEL, MAINE, THURSDAY, JUNE 25, 1925.

4 Cents Per Copy—\$2.00 Per Year

BETHEL AND VICINITY

Miss Erna Marshall is assisting in the A. & P. store.

Mr. E. C. Park was in Portland on business, Thursday.

Miss Ethel Yeorgies has employment at Elmer's restaurant.

Miss Marion Frost is home from her school at Keene, N. H.

The grammar school closed last Friday for the summer vacation.

Miss Kathryn Hanson is attending summer school at Harvard College.

Miss Esther Tyler has finished her school at Bath and returned home.

Mrs. Rosie Swan and Mrs. Bertha Harding were in Portland, Thursday.

Mr. Clarence Philbrook is home from Norwich University for the summer.

Mrs. Lloyd Luxton and daughter, Barbara, were in Norway last week.

Mr. George Harding spent Wednesday with his sister, Mrs. A. E. Copeland.

Miss Ola Hutchins is the guest of her sister, Mrs. Frank Bartlett, and family.

Prof. W. R. Chapman and family have moved to Shelburne, N. H., for the summer.

Mrs. Roscoe Hill and four children were Sunday guests of Mrs. Ida Douglas.

Mr. Allen Payne has sold his house on Vernon Street to John Gill of Greenwood.

Mrs. Charles Stowell of Locke's Mills was a guest of Mrs. Charles Davis, Wednesday.

Mr. Harry Hastings accompanied Mr. Ruel Chapman to Lewiston last week for a visit.

Miss Lelia Estes returned to Woodville, Tuesday, where she is training in the hospital.

Mrs. Lennie Howe has gone to Kennebunk Beach where she has employment for the summer.

Mr. Albert Silver has moved his family into the Lucy Bond house at Northwest Bethel.

The W. R. C. meeting will be held this Thursday evening and a Flag Day program will be given.

Mr. and Mrs. P. L. Edwards and daughter, Dorothy, are spending a few days at Old Orchard.

Mr. and Mrs. H. L. White and two children of Auburn are guests of Mr. and Mrs. E. J. Tyler.

Miss Mina Stevens of Chesterville, Me., is the guest of her sister and family, Mrs. S. B. Greenleaf.

Mrs. Ralph Perkins and child of So. For. are guests of her sister, Mrs. Frank Bartlett, last week.

Rev. S. T. Achenbach, Frank Curtis and Charles Austin were in Averill, Vt., on a fishing trip last week.

Mr. Robert Hanson was the guest of Dr. and Mrs. J. O. Gehring at Christmas Cove the first of the week.

Mrs. Zeena Merrill has returned home after spending some time at the home of her daughter in Woodville, Me.

Mr. Elmer Bennett was taken to a hospital in Portland, Monday, where he is receiving an operation for appendicitis.

Mr. and Mrs. F. L. Edwards and daughter, Dorothy, went to Portland, Tuesday, where they will spend a few days.

Miss Alice Mann attended the summer convocation at Bowdoin College where her nephew, Donald Kimball, was a student.

Mrs. Laurence Lee entertained the West Bethel Chapel Aid Society at an all day meeting at her home on Vernon Street, Wednesday.

Edna L. Wilson, a student of Princeton Theological Seminary, who has been spending a few days at the home of her parents, Mr. and Mrs. Irving H. Wilson, left for Lewiston, Saturday morning to attend the commencement exercises at Bates College, after which he will return to Portland, N. J., where he is preaching through the year.

SMITH-FRENCH

A very quiet wedding was solemnized at the Universalist Church, Gorham, N. H., Saturday afternoon at three o'clock when Miss Alice P. French and Mr. Daniel R. Smith were united in marriage by Rev. Helene Ulrich. The double ring service was used.

The bride was becomingly dressed in a gown of tan silk with cream lace and carried a shower bouquet.

Those present at the ceremony were Mrs. Anna B. French of Bethel, mother of the bride, and Mr. and Mrs. William Cunningham of Gorham, N. H.

Mrs. Smith is the daughter of Mrs. Anna B. French and has been employed as a telephone operator at the local exchange and is now assistant clerk at Bethel Inn.

Mr. Smith is the son of the late Ahira and Georgianna Smith and has been employed for several years with the Van Telephone & Telegraph Co.

Mr. and Mrs. Smith will make their home with the bride's mother on Church Street.

G. A. 1911 REUNION

The Class of 1911, Gould Academy, held their annual reunion at Lakewood Camp, Middleboro, last Sunday.

Members of the party from Bethel, Hanover and Rumford gathered at South Arm at 10 o'clock where they were met by Capt. Coburn's boat and taken to the Camp, the Errol contingent joining them there.

After doing justice to the dinner, for which the place is famous, the happy crowd embarked for Upper Dam, enjoying the beautiful scenery and singing the old school songs on route.

Some time was spent at Upper Dam before the return trip, which ended all too quickly. The day was ideal for such an excursion, the only regret being that more of the class could not be there.

Those present were Mr. and Mrs. Ivan Arno, Mr. and Mrs. Cleveland West, Errol; Mr. and Mrs. Parker Russell, Hanover; Mr. and Mrs. Clifton Bean, Mr. and Mrs. Freeman Bean and children, Virginia and Kenneth, Rumford; Mr. and Mrs. Arvid Brown, Mr. and Mrs. Carl Brown, Mr. and Mrs. Leslie Davis, Miss Molly Stanley, Miss Ida Packard, Mr. Alton Carroll, Bethel.

The enjoyment of the party was much increased by the courtesy of the management at the Camp and the "skipper" of the good ship throughout the voyage.

"HIS UNCLE'S NIECE"

The comedy, "His Uncle's Niece," copyright 1922 by the author, H. W. Sargent, and published by Walter H. Baker Co., of Boston, will be presented at Odell Hall, Bethel, Friday evening, June 26, by local talent from West Bethel.

Between the acts there will be musical, vocal and other specialties.

Dancing will follow and Lord's Orchestra of four pieces will furnish music for the show and dance.

Mr. E. C. Vandenberg is taking his annual vacation from his duties as mail carrier on Route 4. Mr. Alton Payne is substituting for him.

Mr. and Mrs. William Cunningham of Gorham, N. H., were in Bethel, Tuesday, to attend the funeral of Mrs. Cunningham's brother, Barton Smith.

Messrs. F. I. Clark and Owen Demeritt, who have been building a camp at Upton for Tree Dukes, have completed their work there and returned home.

Mr. Harold Rich and son, Stuart, of Torrington, Conn., are guests of his parents, Mr. and Mrs. Elmer Rich, Mrs. Rich and son, Robert, stopped over at Bethel, Monday, to visit her parents, Mr. and Mrs. Feary.

Mrs. Catherine Howe entertained some of her friends at ten to twelve o'clock, Tuesday, at her home on Church Street, where they will spend a few days.

Mrs. Alice Mann attended the summer convocation at Bowdoin College where her nephew, Donald Kimball, was a student.

Mrs. Laurence Lee entertained the West Bethel Chapel Aid Society at an all day meeting at her home on Vernon Street, Wednesday.

Edna L. Wilson, a student of Princeton Theological Seminary, who has been spending a few days at the home of her parents, Mr. and Mrs. Irving H. Wilson, left for Lewiston, Saturday morning to attend the commencement exercises at Bates College, after which he will return to Portland, N. J., where he is preaching through the year.

CUMMINGS REUNION

Last Sunday afternoon occurred a reunion of the Cummings family, at which the Rev. G. H. Wilbur was the guest of honor. Dinner was spread on the lawn at the home of Mr. and Mrs. Abel Andrews and about 70 persons were present to enjoy it. Of the twenty-seven living grandchildren of the late Stephen and Nancy (Frost) Cummings, sixteen attended this reunion. The rest of the company were their wives and husbands, children and grandchildren and a few others of more remote connection. A photograph of the company was taken, also one of the sixteen immediate grandchildren. As the cameras were put away, Mrs. G. H. Wilbur was inspired to sing "The End of a Perfect Day," and then many of the company motored up to the old Cummings homestead a mile away. On returning to the Andrews farm foreclosures were said, especially to Rev. and Mrs. Wilbur who started Monday for their home in Oregon.

Among those present on this occasion were Mr. and Mrs. Abel Andrews, Rev. and Mrs. G. H. Wilbur, Hood River, Ore., Mr. and Mrs. Melville Wilbur of Brighton, Mrs. Mabel Wilbur of Otisfield, Mr. and Mrs. Alfred Clark and son, Richard, and Mr. and Mrs. Eric Bonwick and Eric Jr., of St. Petersburg, Fla., Mr. and Mrs. P. L. Chapman and daughters, Gertrude, Alice and Frances of Bethel, Mr. and Mrs. Adelbert Bird of Portland, Mr. and Mrs. Chas. Cummings of Hebron, Mr. and Mrs. Arthur Cummings of Oxford, Mrs. Myra Cummings Merrill and daughter, Lillian, of Sweden, Mrs. Edith Grover, Mr. and Mrs. Chester Wheeler and children, Hope, Roger, Albert, Chester, Jr. and Esther of West Bethel, Mr. and Mrs. Fred Wood, Miss Amy Wheeler, Mr. and Mrs. Wesley Wheeler and daughter, Myra, Mr. and Mrs. Lyman Wheeler, Miss Mary Cummings, Mr. and Mrs. H. L. Bean and daughters, Edna, Adelaide, Florine and Marie, all of Bethel, Mrs. Inez Bean, Mrs. Angie Bean, Mr. and Mrs. Irving Becker, Mr. and Mrs. Lucien Andrews, Mr. and Mrs. Wallace Cummings, all of Albany, Mr. and Mrs. Arthur Andrews and four daughters of Bryant Pond, Mr. and Mrs. Arthur E. Clark of South Paris.

THE J. E. JONES LETTER

WHO'S RUNNING THE GOVERNMENT

The people of the United States like to believe in the Constitution adopted by their forefathers, and they are kept by the declaration that the executive, legislative, and judicial branches are separate and distinct. Nevertheless, Americans have never given a permanent place in their affections presidents who have not occasionally taken clubs to Congress, and told the legislative branch of the Government where its head is.

Now there is a big question that must be met and faced in determining just how independent of the President many of the non-partisan commissions and boards are going to be. This all grows out of the fact that administration policies frequently fail to agree with the wishes of the commission. A notable instance of this kind has been the refusal of President Coolidge to accept the majority report of the Tariff Commission concerning the tariff on Cuban sugar. The Tariff Commission is about as popular at the White House as a big fly buzzes over a picnic lunch, and there are evidences that the President may reach the same conclusions about "non-partisan" tariff-makers as did two of his recent predecessors who forsook the idea while they were in office, and decided that "there ain't no such animal."

The Shipping Board and the Federal Trade Commission are partially manned by officials who are not in agreement with the President. President Coolidge has shown a distinct disinclination to unduly interfere with these groups, but he has not a temperance that yields to policies with which he fundamentally disagrees. In consequence there may be some show-downs in Washington this winter to determine who is running different branches of the Government.

FORECASTING THE WEATHER

A scientist connected with the Smithsonian Institution has been predicting the actual daily temperatures of New York City early a week in advance every day for over a year. He disregards the telegraphic data of the Weather Bureau and makes his predictions entirely by solar studies.

Dr. Clayton, one of three astronomers of the Smithsonian Institution, who has attracted wide attention, explains that the bright patches on the sun called faculae mean a hotter sun is coming. So do numerous sun spots, but the sun spots on the center of the sun's disk seem to carry a cloud over them, and cut off our sun heat a little for a few days. The Smithsonian Institution has observatories in Arizona and Chile, where they determine with special instruments the amount of heat coming from the sun each day and forward the result to Washington by telegraph. Clayton, formerly official forecaster of Argentina, shows how these changes in the sun's heat affect North America. Up in the Northwest of Canada they affect the barometer and the thermometer the same day, but it takes three days for these changes to reach the coast at New York or Boston. Strangely enough, it is not an increase but a decrease of solar heating that makes it warmer in the East. Clayton even suggests that the glacial period was due to low per cent rise in the sun's heat, and gives a very good map to prove. The scientists with their telescopes have it all figured out that they can accurately predict the weather with solar radiation measurements.

THE PRANUT TRUST

Fifty years ago one could buy a bushel of peanuts in Virginia for a nickel, but the crop in that State is now worth about \$30,000,000 annually. They no longer make paper bags small enough for a nickel's worth of peanuts at the store and it takes at least a dime to help feed the elephant.

The peanut trust has been on trial at Norfolk, Virginia, charged with violating the Sherman Anti-Trust law, and an important decision has been entered in the Federal District Court which so far as the restriction of trade among states engaged in interstate commerce, the decision permits the peanut trust to retain its present structure, so as to protect the American peanut industry against foreign competition. It may regulate tariff schedules and fix transportation rates, as well as arbitrate disputes between sellers and purchasers, fix the transportation rate on peanuts, and from establishing rules concerning the acceptance of orders, the quality of crops or farmers' stocks on hand, sales, demand or prices, are forbidden.

PASSING THE TAX BUCK

Telling how they proposed to reduce a tax on a sort of summer decoration that has been sold for as long as the past week or so by the Secretary of the Treasury, Mr. William C. Clegg, and Congressman Thomas. It is their job to formulate the tax measures for the fiscal year. The Mellon plan calls for a maximum for a reduction of the estate tax from twenty to ten per cent, and everyone whose estate is subject to the tax collector will be reduced in estate tax for the plan. In the Democratic corner sits Senator Simmons of North Carolina, an experienced and able legislator, who proposes that the estate tax shall be put at about forty per cent. Simmons will lead the minority fight in the Senate, and his arguments in favor of his plan will seek to show that the

PIANO RECITAL

The piano recital by the junior pupils of Mrs. Nellie Brickett gave a delightful and varied program at Grange Hall, June 19. Some of the performers were beginners, while some had several terms of lessons and a finished technique to their credit. Every number was well and faithfully done and Mrs. Brickett deserves much praise for her patience and efficiency.

Following is the program:

Unit—Witches Flight, Dorothy Edwards, Mrs. Brickett

Mountain Peak, K. Laurie Paxton

Sally Chapman

Waltz of the Oracles, Demagogue

Bertha Cross

Blue Flower Waltz, Baldwin

June Brown

a. Dolly's Lullaby

b. Pussycat Waltz

c. Sailboat

Eleanor Lyon

The Windmill, Arthur C. Morse

Paul Chapman

Fountain Mazurka, Kern

Mary Tibbetts

Starlight Waltz, E. Sparrow

Sylvia Merrill

Freedom Forever March, Crammond

Ashby Tibbetts

Camellia, Fieldhouse

Dainty Waltz, Fieldhouse

Barbara Heath

Apple Blossom March, Rosewig

Hildred Bartlett

a. Little Soldier Boy

b. Rolling Hoop Waltz

Richard Davis

Silver Nymphs, Carl Hein

Dorothy Edwards

John Twaddle

Hawaiian Dances, Bonner

Merle Connor

Waltzing Mice, Maria Bonito

Lucia Van Den Kerkhoven

My Ladies Garden, Morrison

Betty Brown

Barefoot, Offenbach

Convent Echoes, Bonner

Lila Conner

Heart's Desire Gigue, Myra

Ruth Bennett

Chapel in the Mountains, Wilson

Theodore Eames

Minnet A. L. Antigue, Paderewski

JULIUS P. SKILLINGS

Mr. Julius Palmer Skillings, one of Bethel's most respected and beloved citizens, passed away at his home in Skillingston, Tuesday evening after an illness of a few weeks.

BARTON A. SMITH

Barton A. Smith died at the Fairfield Sanatorium, Friday, June 19, after an illness of long duration.

He was the son of the late Ahira and Georgianna Smith, and was born in Newry, Jan. 7, 1850. When quite young he moved with his parents to Bethel where he was educated in the public schools and Gould Academy. He was for a number of years a successful teacher, giving up this work to accept a position as mail clerk in Portland. After serving in this capacity for several years ill health forced him to give up this position.

He married Mrs. Cora D. Russ of Portland, who survives, also a stepson, Reginald Smith. He also leaves a brother, D. R. Smith of Bethel and a sister, Mrs. William Cunningham of Gorham, N. H. The remains were brought to Bethel and prayer was offered in the Riverside cemetery by Rev. S. T. Achenbach.

BOY SCOUTS ON CAMPING TRIP

Scoutmaster C. B. Oliver and twelve of the local Boy Scouts left Monday morning for a week's camping trip at Mr. Oliver's old home in Phippsburg, Me. Mr. H. C. Rowe and Mr. Roy Davis furnished transportation for the boys. Mr. Rowe stopped for a few days with them.

Those who went in the party were: Wendell Gibbs, Charles Chapin, Milan Chapin, Jr., Robert Bean, Charles Haselton, Frank Cousins, Herbert Rowe, Jr., William Wight, Theodore Eames, Edward Pools, Wilbert Bartlett, Warren Hutchinson.

They expect to return home Saturday of this week.

Mrs. Harry Brown entertained the meeting at a supper Tuesday. Beans baked in the ground, were served and a delightful time was enjoyed by all.

Miss Ruth Emery is attending the Girls' Conference at Camp Maquis, being sent as a delegate from the Y. W. C. A. of Nason Institute, Springvale, where she is a student.

The W. C. T. U. met with Mrs. J. C. Hillings, Tuesday afternoon. Reports of the County Convention were given and plans for the work for the present year were discussed.

Friends are pleased to hear that favorable reports are received from Mrs. Charles Brown who submitted to an operation at the Eye and Ear Infirmary at Portland last Thursday.

Among those from out of town who came to attend the funeral of Barton Smith, Tuesday, were: Cora D. Smith, Mrs. Hanna Uiterstraum, Albert Uiterstraum, Harold Uiterstraum of Portland; Arthur H. Wilson of Nashua, N. H.

Mr. Roy Davis, who carried a party of Boy Scouts to Phippsburg, Me., Monday, ran into the road patrolman's road machine at Snow's Falls. Luckily no one was hurt, but the horses became frightened and ran away, damaging the road machine to some extent.

When the country discovered that immigrants were coming into the United States so fast that the melting pot was constantly boiling over Congress got busy and put up the laws. After a while some of the principal labor employers found that there was a shortage of so-called common labor. Attempts followed to amend the immigration laws so as to permit the entrance to our ports of more laborers from Southern Europe of the kind who would be willing "to do the dirty work." This was the very kind of immigration which it was desired to restrict. High minded citizens pleaded for educational tests, and asked for the imposition of rules that would improve the quality of immigrants. As a result there came the charge of "race prejudice."

It seems to be recognized among thoughtful people that in view of the fact that the United States is shifting from agricultural development to commercial and industrial growth and increasingly populated cities that immigrants who are most desired are those outside the farming populations of Europe. Evidently the country needs to recruit brown and muscle because the population of white colored men is ample.

TRAIN SCHEDULE

Express train service on the Canadian National Railway goes into effect Sunday, June 28. The arrival of trains to Bethel is as follows:

Trains leaving Bethel for Portland:

Train No. 14, daily, leaves Bethel at 8:30 A. M.

Train No. 12, daily except Sunday, leaves Bethel at 8:45 A. M.

Train No. 16, daily, leaves Bethel at 1:12 P. M.

Trains leaving Bethel for Island Pond and Montreal:

Train No. 17, daily, 10:37 A. M.; train No. 11, daily except Sunday, 1:21 P. M.

Train No. 15, daily, 11:16 P. M.

ASKED AND ANSWERED

(This is a valuable educational feature in The Oxford County Citizen. Send in your questions, and address them to W. H. Press Association, Continental Trust Building, Washington, D. C. Mention this paper when you write. Enclose two cents in stamps for reply. Do not include trivial matters or questions requiring extensive research.)

Q. Does hard thinking use up one's energy?

Probably a small amount of energy is used up by nerve cells passing along messages of any kind, but it is much less than a hundredth part of the energy used by muscle cells when they work. The reason we grow tired when engaged in mental effort is because of the continued muscle strain of the eye in reading, or the ear in hearing, or the general body muscles in holding themselves still and tense when we are very intent on something. This will explain why people get tired and nervous when they have the phones over their heads when listening to the radio.

Q. Where can I obtain a list of the male passengers of the Mayflower?

The male passengers who landed at Plymouth, Massachusetts, December 31, 1620, from the Mayflower were Isaac Allerton, John Alden, John Allerton, William Bradford, William Brewster, John Billington, Peter Brown, Richard Brinton, John Carter, Francis Cook,

One Grateful Mother's Tribute

"I would not be without the famous

Dr. True's Elixir

for it is a faithful friend all year round. At first signs of dull feeling, fatigue or restlessness I give my children a few doses and then rest assured that everything will be all right."—Mrs. Flora Desautels, Worcester, Mass.

The "kiddies" LIKE Dr. True's Elixir—grandmothers call it

The True Family Laxative

Will relieve every member of the family of constipation. \$1.25 per bottle.

James Chilton, John Craddock, Edward Clark, Edward Doty, Francis Eaton, Thomas English, Samuel Fuller, Edward Fuller, Moses Fletcher, John Goodman, Richard Gardiner, John Howland, Stephen Hopkins, Edward Lester, Christopher Martin, William Mullins, Edward Margeson, Dequay Priest, Thomas Rogers, John Rogdale, Captain Miles Standish, George Soule, Edward Tilly, John Tilly, Thomas Tinker, John Turner, Edward Winslow, William White, Richard Warren, Thomas Williams, and Gilbert Winslow. Their men servants were: Carter, Coper, Ely, Holbeck, Hooks, Langemore, Latham, Minter, More, Prower, Sampson, Story, Thompson, Trevoire, Wilder.

Q. What is the Chinese Wall? The Chinese Wall is the largest in the world and was completed by the first emperor of the Tsin dynasty, about 220 B. C., as a protection against Tartars. It traverses the northern boundary of China, and is carried over the highest hills, through the deepest valleys, across rivers, and every other natural obstacle. Its length is 1250 miles, including a parapet 3 feet, the total height of the wall is 20 feet; thickness at the base, 25 feet, and at the top, 10 feet.

Q. Does the word Reverend appear in the Bible? The word Reverend occurs but once in the Bible, which is in the ninth verse of the 111th Psalm.

Q. Is there a verse in the Bible containing all the letters of the alphabet, and where is it? The 23rd verse of the seventh chapter of Ezra contains all the letters of the alphabet, except the letter J. Any printer will tell you that the letter J had no regular place in the original printer's case. It was put in box that was left over after the letter Z.

Q. Did the gentlemen of the Colonial period wear short or long hair? Old portraits show that the fathers of our country usually wore long hair. The common people had straight, unkempt hair, while the "gentlemen" wore their hair braided and tied back with a ribbon.

Q. What is the object of the new Masonic Temple at Alexandria, Virginia? It is to be a memorial to George Washington, the Mason, who belonged to and was Master of the Alexandria Lodge. The original furnishings of this lodge, including Washington's apron, robe, and many relics, are viewed annually by thousands of people. The lodge will be moved from its present quarters

into the new Temple. Q. What part of the country was called the New Netherlands in early days? And where was Laconia, Upper California, and the New Philippines?

The original territory included in the New Netherlands embraced all, or parts of New York, New Jersey, and Vermont. Laconia was one of the early names for Maine, which was also at one time included in what was called Massachusetts, and at another time New England. Massachusetts as it exists today was also in the territory of New England, as well as of North Virginia, Utah Territory was at one time Upper California, and Texas was the New Philippines.

Q. Are cherries, canned with seeds, poisonous after being canned a year or more? Can pure alcohol be made from fruit seeds?

The U. S. Dept. of Agriculture says to the first question "No." While cherry kernels contain amygdalin, a body which may be broken down into the poisonous prussic acid when the enzyme emulsin is present, this enzyme would be readily killed by the heat of the canning process. In reply to the question can pure alcohol be made from fruit seeds, it may be said that alcohol is produced by the fermentation of sugar. Whether alcohol could be produced from fruit seeds would depend on whether sugar, or substances convertible into sugar, were present in the seeds. It is known that such substances are present in many fruit seeds, but in comparatively small quantities.

Q. What is the proportion of living expenses of colored farmers in Southern States compared to the whites? A recent study of this subject made in selected localities of Kentucky, Tennessee and Texas, shows that it costs whites practically double the amount that it does the Negro. The average total expenditures of the colored families was found to be only \$611 as compared with a similar average of \$1,436 for the white families. The disparity does not seem to be so great with regard to food, clothing and shelter, as it does with regard to maintaining standards of living. The white man increases his expenses over the Negro by spending more freely for education, recreation, church support and charity. Expenditures of the colored family for this class of advanced most averaged \$12.50 or 4.6 per cent of their total outlay. This compared with an expenditure of \$41.93 by the white families.

Q. How many people are checked every year by automobiles? If you scan deaths, the number of

checked quarters into the new Temple. killed for 1923 was 16,402, and for 1924, 17,346.

Q. Do shad inhabit both fresh and salt waters?

The Bureau of Fisheries says that shad live in the sea but that at spawning time they go up into the rivers.

Q. Who were the Molly Maguires?

The Molly Maguires committed sensational depredations in the mining district of Pennsylvania between 1832 and 1837, when the society was finally broken up and its secrets revealed. The Molly Maguires was formed in Ireland to resist evictions.

Q. Who was the first signer of the Declaration of Independence?

John Hancock.

Q. How many radios, automobiles, and phonographs are there in private homes? A recent estimate places the radio population at as low as 3,500,000, although other estimates say that it will reach 5,000,000. There are supposed to be 15,000,000 automobiles in use and 9,000,000 phonographs.

Q. How many Generals are buried in the National Cemetery at Arlington?

General is a rare title, commonly confined with that of Brigadier General, Adjutant General, and Major General, a number of whom are buried at Arlington. But the United States War Department says that only one person bearing the rank of General is buried in Arlington National Cemetery, namely Philip H. Sheridan.

Q. Will you kindly inform me what will remove the white checked appearance of varnish caused by a damp dish sitting on it or by water?

There can be removed by rubbing some good oil or furniture polish on the place.

Q. Has there been a very material increase in the cost of maintaining public schools in cities during the past few years?

According to the United States Bureau of Education the increase in cost of city schools during the past year over 1921-22, in cities of population of 100,000 or more increased \$7.23. In cities with a population exceeding 50,000 showed an increase of \$2.75. In cities of 100 to 250,000 it was \$13.26.

Q. Is more people swim nowadays than "when father was a boy?"

The answer is uncertain because we do not know just when "father was a boy." Vital statistics are not collected with regard to swimming. However, official reports show that a great many high school buildings and playgrounds contain swimming facilities. In military posts and at summer civilian training camps swimming is given, as a matter of course. The American Red Cross has been the most significant factor in producing water safety. Most American cities maintain public bathing facilities. The number of swimmers is increasing every year. In former years girls were not taught to swim; now they are competitors of men in that art.

Q. What indication have we that man's ancestors had tails? At the lower end of the human backbone there are six extra bones or vertebrae which are separate in babies but fuse together in later life into two more or less solid bones. They are useless to us and are buried in the flesh of the back so that they cannot be seen except in a skeleton or X-ray. Scientists believe these are vestiges of the tail bones.

Q. What is President Coolidge's favorite piece of melody? This particular piece is "Lord Godfrey Amherst," which is one of the most stirring college songs extant. It has an inspiring march song. The song runs: "Oh, Lord Godfrey Amherst was a soldier of the King

And he came from across the sea, To the Northmen and the Indians he didn't do a thing In the wilds of this wild country. And for the royal majesty he fought with all his might. For he was a soldier loyal and true And he sang and put the enemies that came within his sight. And he died for and for more when he was brought home.

Lord Godfrey Amherst, a British good, who fought in North America, Ruled the British Empire, President Coolidge's alma mater.

The radio listener should be on guard against the cheap stations and the cheap music during the summer, and to get along with the big demand for music he should get the best. In other words, he should get the best. There is no such thing as a free lunch, and there is no such thing as a free radio. If you want a good radio, you should get a good one. If you want a good radio, you should get a good one.

Q. How many people are checked every year by automobiles? If you scan deaths, the number of

checked quarters into the new Temple. killed for 1923 was 16,402, and for 1924, 17,346.

Q. Do shad inhabit both fresh and salt waters?

The Bureau of Fisheries says that shad live in the sea but that at spawning time they go up into the rivers.

Q. Who were the Molly Maguires?

The Molly Maguires committed sensational depredations in the mining district of Pennsylvania between 1832 and 1837, when the society was finally broken up and its secrets revealed. The Molly Maguires was formed in Ireland to resist evictions.

Q. Who was the first signer of the Declaration of Independence?

John Hancock.

Q. How many radios, automobiles, and phonographs are there in private homes?

A recent estimate places the radio population at as low as 3,500,000, although other estimates say that it will reach 5,000,000. There are supposed to be 15,000,000 automobiles in use and 9,000,000 phonographs.

Q. How many Generals are buried in the National Cemetery at Arlington?

General is a rare title, commonly confined with that of Brigadier General, Adjutant General, and Major General, a number of whom are buried at Arlington. But the United States War Department says that only one person bearing the rank of General is buried in Arlington National Cemetery, namely Philip H. Sheridan.

Q. Will you kindly inform me what will remove the white checked appearance of varnish caused by a damp dish sitting on it or by water?

There can be removed by rubbing some good oil or furniture polish on the place.

Q. Has there been a very material increase in the cost of maintaining public schools in cities during the past few years?

According to the United States Bureau of Education the increase in cost of city schools during the past year over 1921-22, in cities of population of 100,000 or more increased \$7.23. In cities with a population exceeding 50,000 showed an increase of \$2.75. In cities of 100 to 250,000 it was \$13.26.

Q. Is more people swim nowadays than "when father was a boy?"

The answer is uncertain because we do not know just when "father was a boy." Vital statistics are not collected with regard to swimming. However, official reports show that a great many high school buildings and playgrounds contain swimming facilities. In military posts and at summer civilian training camps swimming is given, as a matter of course. The American Red Cross has been the most significant factor in producing water safety. Most American cities maintain public bathing facilities. The number of swimmers is increasing every year. In former years girls were not taught to swim; now they are competitors of men in that art.

Q. What indication have we that man's ancestors had tails? At the lower end of the human backbone there are six extra bones or vertebrae which are separate in babies but fuse together in later life into two more or less solid bones. They are useless to us and are buried in the flesh of the back so that they cannot be seen except in a skeleton or X-ray. Scientists believe these are vestiges of the tail bones.

Q. What is President Coolidge's favorite piece of melody? This particular piece is "Lord Godfrey Amherst," which is one of the most stirring college songs extant. It has an inspiring march song. The song runs: "Oh, Lord Godfrey Amherst was a soldier of the King

And he came from across the sea, To the Northmen and the Indians he didn't do a thing In the wilds of this wild country. And for the royal majesty he fought with all his might. For he was a soldier loyal and true And he sang and put the enemies that came within his sight. And he died for and for more when he was brought home.

Lord Godfrey Amherst, a British good, who fought in North America, Ruled the British Empire, President Coolidge's alma mater.

The radio listener should be on guard against the cheap stations and the cheap music during the summer, and to get along with the big demand for music he should get the best. In other words, he should get the best. There is no such thing as a free lunch, and there is no such thing as a free radio. If you want a good radio, you should get a good one. If you want a good radio, you should get a good one.

KEEPING WELL

GOLD CURE FOR CONSUMPTION
DR. FREDERICK E. GREEN
Editor of "HEALTH"

IN A RECENT article on the newly announced gold cure for tuberculosis, I advised suspended judgment until more was known about this treatment.

Evidently we are in a fair way to more accurate knowledge in regard to its value. Dr. Peter C. Clemensen, who was sent to Copenhagen by the Chicago health department to study this new method of treatment, has just returned and made his report. Samples of the new drug, which is known as sanocrysin, have been sent to the hygienic laboratory of the United States public health service, where a committee of experts headed by Dr. Lindsay R. Williams of the Tuberculosis Congress of America and Dr. George W. McCoy, chief of the hygienic laboratory, will make a careful investigation of its value.

Sanocrysin is, in chemical language, an inorganic gold salt, made up of gold, sodium and sulphur. By a salt is meant a combination of what is called a base with an acid. It is made in a chemical laboratory rather than by the action of animal or vegetable life, as are the organic serums.

This substance was first used in the treatment of tuberculosis by Dr. Holger Moellgard of Copenhagen. In many respects it resembles salvarsan, an arsenic salt first made by Ehrlich, and now widely used in the treatment of syphilis, pernicious anemia and other diseases.

Sanocrysin is used in the form of a watery solution and is injected directly into the veins. It is carried through the body by the blood. It has no injurious effect on a healthy person. When it comes in contact with the tuberculosis germs in the lungs, it destroys them, thus stopping the progress of the disease.

These are the claims of its discoverer. It is to be hoped that they are correct. Whether they are will be proven or disproven by the experiments and investigations that will be undertaken at once by the public health service and the anti-tuberculosis organizations. Until these investigations are completed no attempt will be made to treat human beings. If the claims and expectations of its discoverer are found to be correct, sanocrysin may prove to be as great an advance in the war against disease as salvarsan and insulin.

WEEKLY MENU SUGGESTIONS

By NELLIE MAXWELL

With the main dish provided for, and one or two good vegetables, the dinner planning is nearly finished. Unvaried diet is often the cause of stomach trouble.

SUNDAY—Breakfast: Oranges, shredded wheat, bacon, toast. Dinner: Baked tenderloins of beef, mushroom sauce; buttered beans, lettuce salad. Supper: Cornmeal mush and milk, cake.

MONDAY—Breakfast: Grapefruit, fried ham, coffee. Dinner: Mutton stew with vegetables, jelly roll, cocoa. Supper: Scalloped potatoes, sliced tenderloin of beef, pickles.

TUESDAY—Breakfast: Stewed prunes, buttered toast, poached eggs. Dinner: Beefsteak, smothered with onions; water cream salad, creamed corn. Supper: Shredded cabbage, fruit cake.

WEDNESDAY—Breakfast: Baked apple, waffles, maple syrup. Dinner: Liver and bacon, baked potatoes, string beans, rhubarb pie. Supper: Milk toast, sliced dried beef, olives, chocolate cake.

THURSDAY—Breakfast: Oatmeal with raisins or dates, French toast, coffee. Dinner: Baked hash, buttered turnips, whole wheat bread, ice cream, cake. Supper: Strawberry shortcake, tea.

FRIDAY—Breakfast: Orange, bran with milk, molasses, coffee. Dinner: Salmon steaks with tartar sauce, mashed potatoes, mustard pickles, strawberry pie. Supper: Sardines on toast, lettuce salad, new onions.

SATURDAY—Breakfast: Strawberry, raisin, oatmeal, gridle cake. Dinner: Potato soup, cheese sandwiches, radishes, green peas. Supper: Baked beans, steamed brown bread.

Supper Dish.
Have a hot dish of fried well buttered in a deep boiling dish, cover with a compound after spicing each slice with grated brown. Lay the compound over the top of the dish, and cook over the fire. Bake in a moderate oven until the mixture is set. Then serve at once. Add salt and a dash of cayenne for seasoning.

(© 1924, Western Newspaper Union.)

SOCIETY DIRECTORY

A cordial invitation is extended to strangers who belong to any of these organizations to visit meetings when in town.

NEW ENGLAND NEWS
IN TABLOID FORMNews of General Interest
From the Six States

Mrs. Carrie E. Vincent of Bangor, Me., has attained the highest honor in the National Women's Relief Corps department of Maine, having been elected president after 20 years of active service in the organization.

Against the protest of citizens of East Montpelier, Vt., the Public Service Commission of Vermont gave permission to the Boston & Maine railroad to close its station in that town.

Thomas McCarthy, of San Francisco is calling upon his brother, James H. McCarthy and sisters, Mansfield, Mass. It is his first visit to Mansfield in 50 years. He was born in the vicinity of Paines Corner, and when a young man departed for the West.

Angered by being discharged from his position, Andrew DiStato, 36, married, of East Boston, took a .25 calibre revolver and went looking for Joseph Deale, 53, a sub-foreman on the job. He ended up by shooting Deale and three other men.

Charles A. Flanagan of Charlestown, Mass., who has been active in the State Department of United Spanish war veterans, was elected department commander at the closing session of the 26th annual encampment in the state armory, Chelsea.

The farmers operating roadside stands in all parts of Middlesex county, Mass., held a meeting to form an association to protect their interests against those who do not raise the products, but buy them in the cities and sell them at roadside stands.

For the 22d consecutive year Norwich University, Northfield, Vt., has again been ranked among the first 10 military colleges in the country. It is announced by Pres. Charles A. Plumley. The rating is based on the recent inspection of the cadet corps made by army officers.

Middlebury College, Vt., the 25th college in the United States to receive its charter, celebrated its one hundred and twenty-fifth anniversary, last week. John Garibaldi Sargent, attorney general of the United States was the commencement speaker and two new buildings just completed on the campus were dedicated.

Springfield's population is 142,224, a gain of 12,610, according to the enumeration for the 1925 state census. Estimates of from 145,000 to 150,000 had been made, but the figures are very satisfactory when compared with other cities in Massachusetts, which showed small gains during the last 10 years.

With the signing of final purchase papers, officials of the J. H. Whipple Corporation announced that plans are under way for the erection of a modern fireproof hotel of 700 or 800 rooms on the present site of the Parker House, Tremont and School sts., Boston. The Whipple Corporation operates the Parker House, Young's and Touraine hotels.

Mrs. Edith Nourse Rogers of Lowell, Mass., won a phenomenal victory in the Republican primary in the 5th congressional district. She rolled up the impressive total of over 13,000 votes. Former Senator James W. Gurnes of Reading polled only 1931, nearly half of which were cast in his home town, and former Mayor George H. Brown of Lowell received but 650.

Refusing to pay poll taxes which have accumulated over a period of 10 years, Frank A. Follette of Portland, Me., has been lodged in the county jail and must stay until payment is made. Follette declares that he sold a coil of wire to the city 20 years ago, for which he never received payment, and will not pay any poll tax until the city settles its debt with him.

Reported to be the victim of a hazing stunt at the hands of Babson Institute students in Wellesley, Mass., John Alden, assistant manager and clerk at the Babson Park Club, Wellesley Hills, was taken to the Wellesley hospital suffering from a nervous breakdown. According to a statement by George W. Coleman, president of the institute, the hazing was merely a college boys' prank with no malicious intent.

Rev. Dr. Howard Alexander Briggs, headmaster of Lawrence Academy, Groton, Mass., exclusive school for boys, has tendered his resignation at the request of some of the trustees and the entire faculty of the academy have submitted their resignations in protest of the action. A petition circulated by Rev. E. C. Mitchell, pastor of St. Mary's Catholic church, has been signed by more than 1000 names asking the trustees to reconsider the action.

Nearly 11,000 laws were passed this year out of a total of 18,844 bills introduced in the 1935 legislatures of 35 states, according to the annual legislative report read by Michael J. Hickey, assistant secretary, at the semi-annual conference of the National Industrial Council. Frank legislation, according to the report, played its usual part, running the gamut from an attempt in Connecticut to tax bachelors, old maids and aliens \$1 per year, to one in Colorado to make ownership of a mill a penitentiary offense.

BOSTON MARKET REVIEW

Prepared by the Boston Office of the
Bureau of Agricultural Economics,
U. S. Department of Agriculture

FRUITS AND VEGETABLES: The market on potatoes dropped considerably in price. Friday's sales of Maine Green Mountain brought \$20.00 per 100 lb. bulk. Eastern shore of Virginia, mostly around \$2.50, while North Carolina cabbages sold at 4.00-4.75 for best and low as 2.00 for poorly graded. Beets and carrots continued to sell under a very sharp demand. Northern beets ranged from 1.00-1.50 per crate and carrots 1.00-1.50 per bushel. There was a strange tone to cabbage. Bunched cabbage brought 2.50-2.75 per 100 lb. for Maine stock and 5.00 per crate for Virginia stock. Cabbage cauliflowers were slightly stronger, selling at 2.00-2.50 per head. Latest sales were quoted at 2.50 for Maine stock, mostly 1.50 for standard 20s, and 2.75-4.00 for standard 20s, and 2.75-4.00 for standard 20s. North Carolina cabbages were sold at 2.00-2.50 per head. Best cauliflowers sold at 2.00-2.50 per head. Cauliflowers continued in light supply and the market went steadily, large sizes ranging in 5-bushel containers selling at 2.75.

DAIRY AND POULTRY PRODUCTS: Butter—The fore part of the week the market seemed very firm and considerable accumulation was experienced. However, other discounting markets declining, at the close the tone of the market was somewhat softer. However, the market seemed to be holding its own. At the close the price of butter was 22-24 for creamery, 20-22 for farm, and 18-20 for salt. Eggs—The market was steady and the bulk of the demand seemed to be centered around the grades of eggs. The market showed more strength at the following prices: West 30-32, extra 32-34, extra 34-36, extra 36-38, extra 38-40, extra 40-42, extra 42-44, extra 44-46, extra 46-48, extra 48-50, extra 50-52, HOW

COINAGE OF SILVER WOULD SAVE TREASURY MONEY.

Some time ago it was announced that the United States treasury would seek to put silver dollars into circulation to a greater extent than has prevailed for some years. Assistant Secretary of the Treasury Charles S. Dewey, reveals the reason. In speaking in Boston Mr. Dewey said that a dollar bill costs 1.7 cents for printing and it lasts about four months. A silver dollar costs 1 cent for minting and it lasts indefinitely, says the Pittsburgh Gazette-Times. If 40,000,000 silver dollars are put in circulation to replace bills there will be an immediate saving of \$1,000,000 a year. He remarked further, "Mr. Mellon is vitally interested in creating savings."

A million dollars saved to the United States treasury is of not less value than \$1,000,000 saved in any other enterprise, and the shrewd financier is seen in the discovery of what some might think a small task as not to be worth bothering about.

How Colonial Postal

System Was Organized

In the English colonies in America before 1633 such postal facilities as existed were supplied by private enterprise. In 1633 the General court of Massachusetts took the first step toward the establishment of a government postal system. In Virginia each planter was required to convey the dispatches, as they arrived, to the next plantation, and so on. In 1672 the government of New York established a monthly mail to Boston, and this practice was followed in other colonies. Benjamin Franklin was identified with the early history of the colonial post office. In 1724 he was appointed postmaster of Philadelphia. In 1737 the delivery of letters by post was begun. In 1775 the colonies combined to establish their own post office and to pay the necessary expenses. The Continental Congress appointed a committee to draft a postal system, which was later effected July 26, 1775. Benjamin Franklin was unanimously appointed postmaster general.

How Indians Explain

Formation of Canyon

An Indian legend says that the Grand canyon of Colorado was made by a giant named Pah-i-tha-wah, who was armed with a large flint bullet and a big stick. One upon a time the world was covered so deep with water that nobody knew what to do and Pah-i-tha-wah took the initiative. One day he threw down this flint bullet of the earth, hammering into the heart of the earth, hammering until the canyon was formed, the Indian legend says. Another legend says that there was a great chief who married the daughter of his wife. One of the Indian gods came to him and told him his wife was to be a happy land and offered to take him there that he might see for himself if upon his return, he would come to marry. The great chief promised. Then Pah-i-tha-wah made a trail through the mountains. Then he rolled a river into the gorge and broad and raging that it would engulf any that might attempt to enter thereby.

How Race Has Advanced

Just when and where and how did the human race develop from some more or less apish ancestor? This is the most important of the questions which anthropologists are seeking to answer. Because most of the anthropological work of today are inhabitants of Africa, savants have held that Africa was the scene of man's emergence from darkness and the realm of beasts. Recent discoveries have tended to strengthen this assumption. Nevertheless there is reason to be given of those who still hold that central Asia was "the cradle of the human race."

The plateau of Iran was long given the honor. Now, however, scientists are looking farther east and are casting very strong light upon the discovery of the bones of Peking Man and Peking Peking.

How Characters Grow

Two of the most remarkable characters in fiction were a character has gradually grown his nature to meet and adjust to his surroundings. In the case of the character of the Peking Man, the first appearance of these men with their development. Peking Man and Peking Peking are such growth he gave them the reputation of these characters they were his first to give of himself. (The Peking Man and Peking Peking were to be and to do, and then the characters would come on, but they were in the state of himself, to obey and follow, rather than have his own way with them.) William Loomis Phelps in "The Peking Man."

How Credit Is Employed

It is common that about 60 per cent of the transactions in retail trade and about 80 per cent of the transactions in wholesale trade are settled by means of credit instruments—checks, trade acceptances, drafts and notes.

The Tacna-Arica Dispute

Llamas Used as Beasts of Burden.

terrified by the famous invincible army of the Incas. It is in taking the first step toward a solution of the famous Tacna-Arica controversy, primarily between Chile and Peru, by dividing that province into two parts, that a peaceful solution of the two countries is being sought. The two countries are Chile and Peru, and the dispute is over the province of Tacna and Arica. The dispute is over the province of Tacna and Arica. The dispute is over the province of Tacna and Arica.

The Tacna and Arica question can perhaps best be understood, if it is taken as a rough American equivalent of Alaska, Hawaii, and the Florida question. On the surface, the Tacna-Arica matter in late years may appear to have been merely a question of whether a province should be held and how, but there is a great deal more behind it. As a matter of fact it is intimately concerned with questions that involve Bolivia as well as Peru and Chile, though the first-named country has no claim to the Tacna-Arica area itself and has not been represented in the Washington negotiations. Wars, treaties that are none too clear, indemnities, filibustering expeditions, valuable mineral deposits, strong military positions, national sensibilities and politics—these are some of the many considerations that affect both the two-sided and three-sided aspects of the problem.

Before the War of the Pacific, Peru not only included Tacna, the northernmost province under Chilean administration (what is now known as "Tacna" then consisted of two divisions, "Tacna" and "Arica"), but also Tarapaca, the next province to the south. Peruvian territory, in other words, then extended some 300 miles farther south than the southern boundary of Peru now shown on the maps. Tarapaca is nearly three times as large as Tacna, and in it are much more extensive nitrate deposits than there are in the latter. The loss of Tarapaca, therefore, was of much greater moment to Peru than the loss of Tacna (Tacna-Arica). Tarapaca does not enter the present controversy, however. The treaty that terminated the War of the Pacific ceded the two provinces to Chile, and the only qualification, Tarapaca was not ceded. The treaty provided that Chile should have control of it for ten years, after which a plebiscite was to be held to determine its future sovereignty. The plebiscite was not held as provided and Chile continued to administer the territory while Peru protested. By President Coolidge's decision this delayed plebiscite is to be held in the near future. Through the nitrate deposits are not so great as those to the south still they are sufficiently large to make Tarapaca worth striving for.

Bolivia has been and continues to be a deeply interested spectator in all negotiations between Peru and Chile. In the same way Bolivia has been connected with the Pacific, the present Chilean province of Antofagasta was used later to buy a "guerrilla" to the sea from Chile. That country would not sell any of her own territory but was willing to sell a strip of disputed territory to this, so Bolivia has had to remain isolated from salt water, but continues to hope that whatever way the final decision goes she can acquire a path of her own to the ocean.

Though much of the land in Tacna is rather desolate, and water is being hauled across the great desert wastes to water localities, the river valleys are fertile, and the climate of the city of Arica and the coastal strip is delightful. Arica has been called the "most beautiful port between Panama and Valparaiso." In Morro, which towers 285 feet above sea level, ships

are berthed and to the "cath over the door" for masted sailing vessels. The town is also the terminus of the old line highway to La Paz, and the modern railway to that city.

In the eastern part of the province in the Andes there are rich ore veins with silver, copper, and tin.

Although irrigation on a small scale can be practiced in some of the valleys between the Andes and the Pacific throughout the northern part of Chile, Tacna is much more valuable agriculturally than the rest of the arid region. There irrigation on a much larger scale is practicable, and considerable quantities of food are produced. Irrigation dates back to pre-Spanish days. Then as now agriculture was dependent on the streams. Irrigated valleys near the city of Tacna and Arica have been so irrigated from Peru days. Some of the time used for transferring the water from one section to another but in the valleys, several hundred feet below the irrigating hills, the instant of sunset occurs earlier at the western rim than in the other end of the valley. After the sun has set in the lowlands it continues for some time to illuminate the snowy slopes above, which glow with ruby light, then and then turn milky white and fade into darkness.

Used Common Sense. To avoid controversy, the ancient Peruvians brought common sense to bear and agreed to consider it sunset at that moment when the sun ceased to illuminate the snow-capped mountain peaks. This method, known as "calculating the sky view," is still in vogue in the province of Tacna.

As to the origin of the nitrate deposits the discovery of which was the genesis of the Tacna-Arica controversy, scientists disagree. Some claim that it had its origin in seaweed of an ancient period.

The nitrate fields stretch for several hundred miles along the pampas, western rim, which marks the edge of the ancient flood waters. The process of production is simple. The loose rock is carried by mule teams, or cars, to the railroads, through the little railways which circulate through the nitrate establishments, and on to the crushing plant, where, after being broken into small pieces, it is thrown into two vats and boiled until the dissolved saltwater can be filtered.

When evaporated it is cleaned, and the finished nitrate, or nitrate of soda, is packed in bags and sent to the nearest port. The greater portion now comes to the United States to control our salt and to be used in the manufacture of explosives.

Indian Production Limited. Indian production from the nitrate section, is the most important by-product of the nitrate work. Its production is limited to the amount of the nitrate work, and the market may not be overestimated.

Operated for the most part by Chilean and Peruvian capital, 125 of these nitrate establishments, or salinas, as they are known locally, are scattered over the pampa back of Ploque, Iquique and Antofagasta, their last customers discharging the salt. At night, from the train which runs from Tacna south, the myriad twinkling lights of these strange desert towns speak of life and industry in a region altogether dependent for sustenance on the world of trees and pastures.

All the coastal cities in the region of the disputed territory have a great problem in securing an adequate water supply. The water used by the people of Antofagasta, Peru, is brought 25 miles through an eight-inch pipe. Iquique gets its water through a pipe line 145 miles long, and at Antofagasta water is piped 500 miles from the Bolivian Andes. Obviously water service is imperative.

ANDOVER

Children's day was observed at the Congregational church, Sunday morning with a concert by members of the Sunday School. Following is the program:

Opening Chorus
Responsive Reading, School
Prayer, Rev. C. W. Robinson
Song, No. 5
Recitation, Silvia Poor
Recitation, Celinda Hall
Song, No. 8
Violin Solo, Constance Thomas
Announcements
Recitation, Cecelia Sweett
Recitation, Addie Dunn
Song, No. 12
Recitation, Louise Averill
Recitation, Edith Marston
Song, No. 11
Recitation, Dorothy Emerson
Solo, Minerva Pratt
Address, Rev. C. W. Robinson
Recitation, Clara Manzer
Song, Primary Class
Offering
Recitation, Gertrude Manzer
Benediction

Mr. and Mrs. Erion Merrill from Weston, Mass., are visiting her people, Mr. and Mrs. Lewis Akers, and his mother, Mrs. Nora Merrill.

Mr. and Mrs. Frank Bean from Florida are visiting her people, Mr. and Mrs. Fred Smith.

Miss Laura Newton is waitress at the Homestead.

Mr. and Mrs. Clarence Akers from Chelsea, Mass., spent the first of the week with his sisters, Ellen and Annie Akers.

Mrs. Laura Vaughn from Plattsburgh, N. Y., is visiting her sister, Mrs. Helen Abbott, of South Andover.

The Ladies' Aid of the Congregation of Church met Wednesday afternoon with Mrs. L. E. Mills.

NORTH NEWRY
Mrs. Carrie Wright, her father and mother, Mr. and Mrs. W. B. Wright, and Mrs. Carrie Lane left Tuesday morning on a motor trip of several days to Massachusetts.

Mr. and Mrs. Frankie Vail and Mr. and Mrs. F. C. Bennett went to Arizona, Sunday.

P. W. Wright and family and Master Daniel Wright went to Errol, Sunday.

The school at the "Head of the Tide" closed Friday. A picnic dinner on the "Head Hill" at L. E. Wright's was enjoyed by the children as well as a number of parents. Miss Meurs, the teacher, left on the afternoon train for home.

Miss Ella Hanson is at home for a few days.

H. H. Hanson and family enjoyed a picnic dinner with relatives at Sereu Auger Falls, Sunday.

W. B. Overlock, Maine Missionary of the American Sunday School Union, was a guest at W. B. Wright's, Saturday night, attending church services Sunday.

day A. M. here. Mr. Overlock gave a very pleasant and interesting talk at the opening of the Sunday School, and offering help and assistance in any way he could in carrying on the school.

M. A. Kilgore was in town Sunday. Mr. and Mrs. A. C. Wright of Hanover were callers at W. B. Wright's, Monday evening.

"MY NEIGHBORS KNOW HOW MUCH I SUFFERED"

Was Never More Surprised In Her Life Than At The Way Karnak Helped Her, Says Monroe, Me., Woman.

Everyone now seems to be praising Karnak, the sensational new medicine.

Mrs. A. G. Larby, of Monroe, Me., who is very active in community affairs and wife of one of the most extensive farmers in the district, declares:

"I couldn't do otherwise than praise Karnak. Early last summer my right arm became so painful that I lost the use of it completely. Every move I made was simply torture. I couldn't pick up a dust cloth with it, and if I even moved

In the least bit it made me cry out with pain. My digestive organs were in terrible condition also and caused me much suffering from gas and constipation. I could never get a good night's sleep, and mornings I just felt worn out to start the day.

"I was never more surprised in my life than I was at the wonderful way in which I improved when I began taking Karnak. In a week's time I could move my arm without pain. I am no longer bothered with indigestion, gas or constipation, sleep sound and restful at night and feel like a different person. I can never praise Karnak enough for all it has done for me."

Karnak is sold in Bethel exclusively by W. B. Boserman, and by the leading druggist in every town.

NAMIE H. TWITCOMB

Hog House Should Be Built Right to Insure Profits From Industry

By WILLIAM A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1527 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

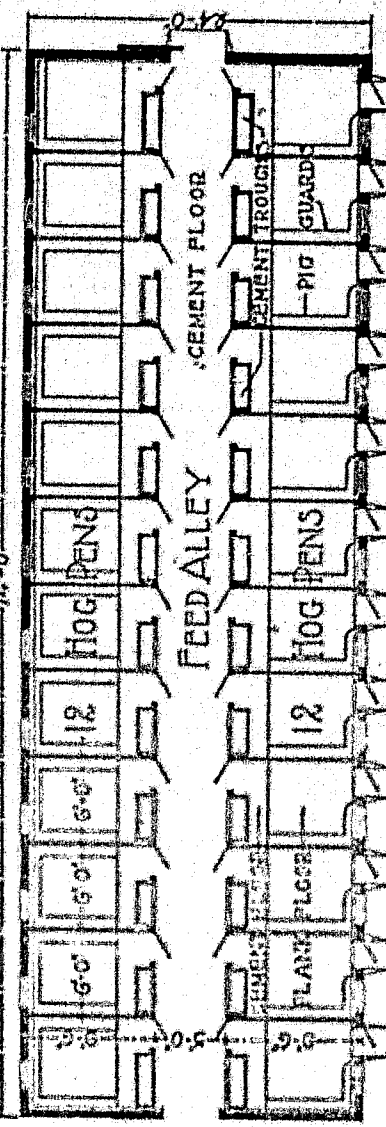

"Pigs Is Pigs" was the name of a short story of some years ago, and the phrase caught the popular fancy and still lives. But to the modern farmer, pigs are something more than pigs. They are a highly profitable stock investment and every care should be taken to make them pay the greatest possible profit. The day is gone when hogs are kept in dirty mud pens, placed anywhere at all and left to take care of themselves as best they can. Such handling is really expensive, for hogs respond most generously to proper housing and breeding conditions and pay liberally for the investment and labor required.

Proper housing for hogs means clean, dry, roomy pens with plenty of ventilation and sunshine. To meet the conditions a well placed and well built hog house must be provided. The principle on which such houses are planned are quite well established and are really quite simple. Two types are commonly accepted. One of these is placed to run north and south and get the advantage of the sun during the entire day's course. Another is placed east and west with windows arranged to get the benefit of the full south exposure to the sun.

It is the second type which is illustrated here. This hog house should be placed facing the south. The upper row of windows, spanning the entire side of the building, floods the pens along the far side with sunlight while the lower row gives an equally good lighting to the pens along the front side. This saw-tooth roof is always the best type for use on a hog house with southern exposure.

This house is a large one, having 24 pens, 12 on each side. A feed alley runs down the center between the two rows of pens, making it easy to fill the feed troughs at each pen with the least labor. The floor is of cement throughout, but plank flooring is laid over the cement inside the pens. This affords a warmer resting place for the hogs and if made in sections is easily taken out for cleaning. A gutter should run along each side of the feed alley to assist the regular cleaning and a feed carrier may also be installed as a labor-saving piece of equipment.

Good ventilation, without injurious

Floor Plan.

drafts, can be secured by opening and closing the two rows of windows as required. It is also possible to install ventilators in the roof which afford a draftless ventilation and are to a large extent automatic in their adjustment. It is well to make the partitions between the pens in the form of gates which can be swung out of the way when cleaning time comes and also permit a better circulation of air because of the open construction.

Of course a hog yard must be provided in front of the building with plenty of space for the whole herd. This may be either a single yard or may be divided into smaller sections running out from the pens. Small doors are provided in each pen of the front row to admit the hogs from the yard while entrance to the house is provided by regular doors at each end of the building.

Most Important Piece of Woodwork Is Stair

In every two-story house the largest and most important single piece of woodwork is the stair. In most houses the stair has a very prominent location in the entrance hall or living room, where it is the first object that meets the view of all who enter.

So the appearance is of paramount importance, for it is the key to the whole interior. No other part of the house gets so much wear as the stairs, so they need to be strongly made to stand hard and constant usage, the materials must be good, and they must be kept painted for reasons of economy and beauty.

More than a hundred pieces, of various sizes and shapes, have to be fitted together to make a complete stair. The fitting of these into a perfect unit that is absolutely rigid and strong requires expert skill. In fact, stairbuilding is a distinct trade in itself and should be done by a specialist in stair work. At the same time, a stair that has elegance, dignity and grace of appearance requires a mind trained in designing.

The parts of a stair—treads, risers, balusters, newels, rail, and so on—are bought from woodwork factories. A complete stair can be secured from these factories also to fit your particular house, using any desired design for the various parts.

It is preferable to buy your stair in this way, because it comes to the job with all parts properly fitted together and machine banded. This saving in carpenter labor alone more than makes up for the slight additional cost of the "complete stair" in any building of the fact that all shortages and overages of material are eliminated, and mistakes in putting the stair together are almost impossible. Choose one that is put together tightly, practically without nails, if you would eliminate "squeaks."

Stairs are two general types—"open" and "boxed." The latter add no feature of beauty to the home, but serve merely as a means of reaching the second floor. They have the advantage of saving space, being inclosed between two walls, and, of course, are less expensive than open stairs. However, there is a decorative—not to say romantic—quality about a graceful, colonial, or sturdy English stair, which adds much to the character of any house.

Open stairs may be "open string" (showing the ends of the treads and risers) or "curb string" (where these are concealed by a straight-edge "face stringer"). Colonial houses would not seem natural without their open stairways with slender white spindles, mahogany treads and voluted handrail.

In selecting a colonial stair would large, heavy-looking ones; and choose one with slender, delicately molded parts, if you would follow historic precedent. Birch is the best wood for these, as it takes both ivory enamel and mahogany stain to excellent advantage. For the English, or Mission, or Chateau type of house, varnished oak stairs—or perhaps stained pine—are better.

Choose Good Hardware, It Is Most Important

Hardware to many home builders is such a small item in the entire cost of a building that they often prefer to attend to larger things like the furniture, walls and other parts of their new home.

And that is where they make their mistake. In the first place give particular attention to the hardware on the front door. This is the first thing a visitor sees while waiting for a door bell to be answered, and one should remember it is the little things that give the lasting impression.

Choose hardware that harmonizes with the general architecture of the rest of your building and that, if you would avoid the commonplace, do not be carried away with hardware that is attractive for itself alone. Remember hardware has two important roles in your home. The first is, it protects your property; therefore, have it strong enough to resist the invaders; second, it serves as an extra decoration.

Dark Rooms

Light, warm colors make a dark, cold room appear just the opposite. For rooms on the sunny-side of the house use the cooler colors. Blue, green and gray make rooms appear larger; yellow, red and orange make them appear smaller. Large areas should always be in subdued tones. Horizontal panels of wood or color appear to lower the height of rooms, while stripes suggest height.

GROVE HILL

Mr. and Mrs. Maurice Tyler entertained Mr. Clarence Meserve and family from Mechanic Falls over the week end. Sunday the entire party motored to Gorham, Berlin and Lancaster, N. H. Miss Alice Mundt is spending her vacation from Simmons College with her parents, Mr. and Mrs. Fred Mundt. Mr. John Anderson and family from Skillington were recent guests at Miss Rachel Mayberry's.

Miss Maudie Haselton of Norway was a guest in the family of W. H. Hutchinson last week.

Mrs. George Frost of Norway visited her sister, Mrs. Fred Wheeler, recently. Miss Gwendolyn Stearns returned from Bridgewater, Mass., Saturday.

Mr. and Mrs. Elmer Lyon from Auburn were week end guests at Harry Lyon's.

Mr. Almon Tyler has employment with E. H. Smith.

Miss Hattie Blake from Berlin, N. H., has been a guest at C. L. Whitman's. Ernest Mundt has employment for the summer at South Waterford.

EAST BETHEL

Master Cedric Russell of Rumford recently visited his grandparents, Mr. and Mrs. Porter Farwell.

Mr. and Mrs. Wm. S. Hastings have returned from a most delightful camping tour through to the Parmachenee Lakes, going by auto and tenting at night.

Mr. and Mrs. Cepion Kimball and children and Mr. and Mrs. S. B. Newton and family motored to Silver Lake, Roxbury, Me., for a Sunday picnic.

Mr. and Mrs. Charles Kimball of Berlin, N. H., and Mrs. F. A. Hamlin of Bethel were Sunday callers of relatives here.

Mrs. Emma Nutting has returned from visiting relatives at Lewiston.

Mrs. Edith Howe and Mr. and Mrs. F. H. Howe motored to South Paris and returned for the day the past week.

Mr. and Mrs. E. A. Trask, Misses Edith and Beulah Trask and Mrs. Etta Bartlett motored to Lewiston for the day the past week to do shopping.

Mr. and Mrs. H. O. Blake, Mrs. Carrie Bartlett, Mrs. George Blake, Mr. Urban Bartlett, Mr. and Mrs. Clifton Dean were recent guests of Mr. and Mrs. George Swan and family at Dixfield.

Miss Maud Cummings, grammar, and Miss Laura Cummings, primary, closed a most successful term of school here June 19. All very much enjoyed the school picnic held in the woods near the school grounds.

WEST BETHEL

The church has been painted. Mrs. George Anger and little son are the guests of Mr. and Mrs. J. P. Mather in Swampscott, Mass.

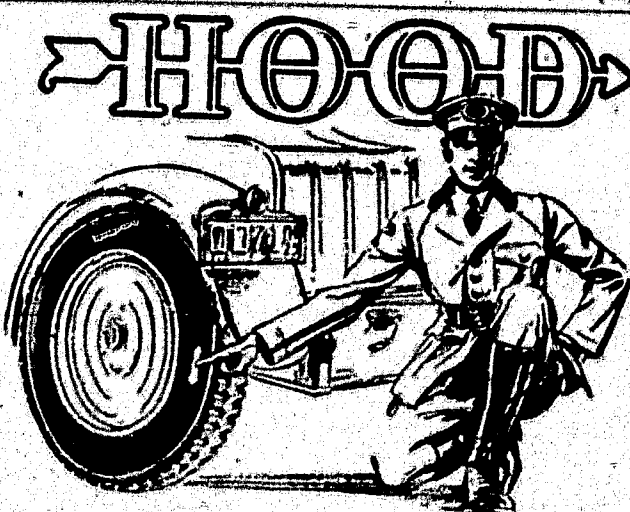

Mr. and Mrs. C. N. Mills of Wildwood Park visited Mrs. Emma Mills one day last week.

Francis Mills is at home for a few days.

Mrs. Hugh Thurston and Howard and Dale called on Mrs. Emma Mills, Sunday.

Mrs. Nettie Mason and son, Gordon, were at Northwest Bethel, Sunday, calling on friends.

Miss Cora Mason, Mrs. Pauline Bray and little girl from Portland were callers at Mellen Mason's, Sunday.

You put off tire troubles when you put on Hoods!

Hood Tires have the stuff in them. They're made to give the best service that a quarter century has taught us to build into them.

We sell HOODS because they always bring our customers back—satisfied!

JULY 4 CELEBRATION

COME TO

South Paris

8:30. BIG PARADE

10:00. MOORE PARK

Side Shows, Band Concert, Street Fair, Sport Events

12:00. DINNER SERVED

Congregational Church, Universalist Church, Methodist Church, Grange Hall

1:30. MOORE PARK

Side Shows, Street Fair, Band Concert

1:30. OXFORD CO. FAIR GROUNDS

Two Ball Games

7:30. ASSOCIATION HALL

Band Concert, Drill, Carnival Dance

There will be an Oxford County Horsehoe Tournament on the Fair Grounds during the afternoon, and contestants are requested to write Walter L. Gray, Chairman of Sports Committee, South Paris, for entrance blanks.

Every event is having special attention and this celebration will, without doubt, be the biggest ever put on in South Paris.

DON'T MISS IT

Come Early. Stay Late. Something Doing Every Minute.

Celebration under the auspices of the Arthur S. Foster Post, No. 72, American Legion

Vacation Days

More than 8,900 Ford cars from every section of the country visited the Yellowstone National Park during the open season of 93 days in 1924—evidence that for long tours as well as short trips, the Ford is the favorite everywhere.

Ford popularity is based upon small first cost and low operating expense. You can buy a Ford on easy payments and take a real vacation this summer—go with the whole family to the mountains, or seashore; visit the Yosemite Valley, the Grand Canyon, Glacier National Park, etc. Wherever you drive you will find Ford Dealers ready to serve and to direct you along the way.

TRUCK FOR HANDLING AUTOMOBILE PARTS

This truck or tractor was devised by a Providence R. I. automobile dealer for handling thousands of machine and other automobile supplies from shops to his warehouse on the dock. In reality it is a truck cut in two. It measures six feet from hub to hub. Its extreme short length makes it possible to turn quickly on the narrowest of piers. Its pulling power is not impaired by its short length. It surpasses anything that has ever been designed for dock use. Such devices are necessary to make a quick hookup and are attached on the rear end. The machine was designed by Mr. Dated W. Flint of Providence.

LUBRICATION OF SPRINGS NEEDED

No Part of the Car Has More Constant Motion or Greater Strain.

A great many people neglect the lubrication of the springs on their cars. Outside of the actual running parts of the car there is no part that has more constant motion or greater strain than the springs, writes Arthur Phillips in *Popular Mechanics*. It is not uncommon to see the springs actually covered with rust. This means that where the leaves rub together there is a metal-to-metal dry contact and, consequently, a great deal of friction that wears out the springs, makes them much more liable to break, and causes the car to "ride like a lumber wagon."

The best way to lubricate the springs is to jack up the car (placing the jack under the frame and letting the wheels and axles hang) and to use graphite or graphite grease between the leaves, which will make a wonderful difference in the way the car rides. It is quite a little job and should be done rather often to insure continuous results.

A method with the writer has used with satisfactory results for some time is this: Have the old dirty oil drained out of the engine periodically. Let it stand in a deep bottle for some weeks. Most of the carbon and dirt will settle gradually to the bottom. The top oil can be poured off easily into a quart or half-gallon can. Pour this oil all along the top leaf of each spring. If the spring is dusty no such oil will do. Drive the car a week and you will find that this oil has collected a fine dust. Do not attempt to wipe or scrape it off. After each spring another half of an ounce of the top. This is waste oil and you can use it liberally.

Oil-leaked Dust.
You will find that the dust next to spring becomes oil soaked. This forms an oil pad which feeds oil continuously to very slight quantities between the spring leaves. The new dust on the outside protects the oil dust and when oil dust helps to improve the oil pad in which each spring is encased.

This is not offered as a substitute equal to a thorough cleaning and lubrication of the springs periodically, but it does keep the springs in better condition than if they were totally neglected.

Automobile Should Fit Stature of the Driver

A tall man in a small car is a painful and uncomfortable spectacle, and while a short man in a big car may not attract so much attention, he is equally ill at ease. This suggests the new problem of how to fit the car to the man. Of course the question is theoretically possible, and the tall man could get a car of suitable dimensions, but we cannot always afford it. The car we would like to have, says the *Motor*, is the American. American people have been offered in the past a car of European design, but the American car is the one that is best adapted to the needs of the American. The car should be of a size that is suitable for the driver, and it should be of a design that is suitable for the driver. The car should be of a size that is suitable for the driver, and it should be of a design that is suitable for the driver.

Self-Oiling Bushing

It is comparatively easy to make a self-oiling bushing. The bushing is made of a soft metal, such as brass, and is of a size that is suitable for the driver. The bushing is made of a soft metal, such as brass, and is of a size that is suitable for the driver. The bushing is made of a soft metal, such as brass, and is of a size that is suitable for the driver.

Beat Train to Crossing

Driving your car, you see a train coming. It's a passenger train, but you are sure you can beat it across the track. So you take the chance. Likely as not you cross safely and are quite a distance away when the train thunders past.

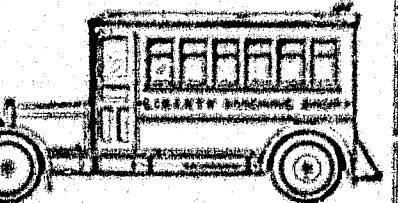

Thousands are killed each year at railroad grade crossings, most of them in autos. Every one of them was sure he could beat the approaching train, except in cases where they were careless and didn't observe the train coming. Now—

The average fast train passes the grade crossing in seven seconds. Are you really so fast for time that you can afford to take a chance on your life to save seven seconds?

Think it over.

Old Automobile Is Made Into Tiny Machine Shop

Wishing to better himself, an enterprising street knife-grinder gathered together enough money to purchase an old discarded flimsy bus, and turned

Instead of the Customer Coming to the Shop, the Shop Goes to the Customer.

It into a self-propelled and self-operating machine shop on wheels. All the seats except the driver's were removed, a hole was cut in the floor for the belt, and a split pulley attached to the drive shaft in line with the hole. The size of the pulley was adapted to the speed of the line shaft.

—Popular Science Monthly.

End Play in Crankshaft Is Noticed by Knocking

End play in the crankshaft is apt to be noticed first when the car is throttled down to about five miles an hour. When there occurs what is commonly called knocking, accompanied by a clacking. If the play is excessive, the knocking will be heard as the speed increases. This condition may be caused by the end of the main bearing becoming flattened, or worn so much that the shaft can move back and forth, and as it does so it pounds against the bearing ends and noise. In many cars with four-bearing crankshafts the second bearing from the rear is designed to take the thrust, and so replacement of that one bearing will remedy the trouble. In three-bearing shafts the center or rear bearing usually is the one requiring replacement. In the few-bearing shafts it is best simply to change the one bearing instead of attempting to remove the play by using two or three bearings with roller bearings.

In some cars a leveling of the shaft ends, those with two and three bearings, may cause a misalignment of the engine with the crankshaft as a result. Even though the bearings be slight, it may cause the motor support to become unbalanced. In time this may result in an actual breakage of the supporting area.

Test of Generator

The proper way to test whether the generator is charging or "dead" is to disconnect it from the electrical system and test it directly with an ammeter. This eliminates all possibility of interference from the battery, battery and switches, which must be considered when reading the ammeter on the dash.

A slipping clutch can be diagnosed by placing the gears in low and letting the car coast past while the clutch is disengaged. If the engine doesn't stall the clutch is obviously slipping.

CHESTER'S CHUCKLES

The tick to work is just well enough to fish.

Mother cuts the dress, daughter cuts the deck.

Before you hob, speak quickly or forever hold your peace.

Who wants to kiss the back of a neck that's been clipped.

A man in an auto accident seldom hits what he is looking at.

What ages father and rejuvenates mother is the charge account.

Expenses and home-coming wives are what some of us fall to meet.

The road to success is a long detour off Easy Street and back again.

A girl no longer blushes at the mention of a petticoat—she asks what it is.

Young men are as wide awake as ever—if you wait late enough in the day.

Perhaps men grow old because women's eyes, thin clothes because they are outmoded.

India is not the only place where a man never really sees his wife's face until after they are married.—Chester C. Conner in the *Chicago American*.

ADS AND SIGNS

Local ad: "Baby, buggy and sulky."

Ad in *Lexington Herald*: "For sale: Flums and damels."

Sign in Hollywood restaurant: "Try our semi-fresh caviar."

Sign in laundry: "We do handwork; no flat" (All right, we believe you.)

Sign in Springfield: "Bath alone, 10 cents." (Best way. Why crowd the tub?)

From an advertisement: "Paint covers a multitude of sins. We've got the paint, have you got the sins?"

The notice, "This Farm For Sale," roused a bureau's curiosity. Approaching the farmer's wife he inquired when the farm was to sell. "Just as soon as a man comes along who can raise the wind," was her prompt and smiling reply.—*Boston Transcript*.

IF—

If Atlas had ever taken a vacation.

If Horacio had written for the movies.

If Cleopatra had started the hair-bolding craze.

If Hamlet had set up housekeeping with Polynna.

If Rip Van Winkle had slept in an apartment house.

If the Lord had tried to vamp her victims with a saxophone.

If there had been censorship in the spacious times of Queen Elizabeth.

If Goldth had dined a rotter's tank when he saw David coming.

If the chiropractors had had to treat Job.—*Life*.

LIFE SAVERS

The kid who gave the landlord the numps on the first of the month.

The laundry boy who delivered your clean shirts a day ahead of time.

A pretty cook when you have trouble getting the iceman to stop every day.

The nervous old lady who jumped between you and a speeding mail truck.

The girl who was stout enough to float when the canoe overturned and you didn't know how to swim.

The visiting relative who turns out to be a somnambulist when there aren't enough beds to go round.—*The Chicago*.

POINTED PARAGRAPHS

The best candidate for office wins—if he gets more votes than the other fellow.

A political disarrangement by party is to be expected, as with a riot which pulled off under the auspices of the other party.

"Once upon a time" is a familiar beginning for a story, and after a man has been once upon a "time" he begins to tell about his wife.

THOUGHTLETS

Let one carry evil report lightly and by and by one's name will put others in flight.

When money grows so fast that one doesn't know what to do with it, philanthropy becomes a pleasant pastime.

An alarm clock will put you to sleep in case you ought to get up, but if it makes no difference whether you get up or not a watch never will put you to sleep.

THE AMERICAN LEGION

(Copy for This Department supplied by the American Legion News Service)

IMPORTANT STEPS IN CHILD WELFARE

The opening recently of two new American Legion billets for orphans of the World War and the appointment of Miss Emma C. Puschner, formerly agent of the St. Louis board of children's guardians, as field secretary for the child welfare division, mark important forward steps in the American Legion's national child welfare program, declared Mark T. McKee, national chairman of the Legion's child welfare committee. One cottage was opened at Otter Lake, Mich., and one at Clarksville, N. J.

The new cottage at Otter Lake is the fourth to be opened there, three cottages having previously been opened. The fourth cottage was built to provide all possibility of crowding at the Otter Lake billet. Twenty-six children can be accommodated in the new cottage. Twelve children were waiting to go into it when it was opened.

The funds to build the new cottages were subscribed by the American Legion and its auxiliary, department of Michigan. That department also established the other cottages at Otter Lake, with the exception of the one built by the national body of the auxiliary from funds contributed by its members.

The Clarksville home is a colonial mansion surrounded by two acres of beautiful grounds. It was purchased with the proceeds of the annual sales of poppies on Memorial day. Legion posts and auxiliary units of the four counties of Burlington, Camden, Gloucester and Salem are responsible for this billet. Ownership of the property will be vested in a local board but the administration of the billet will be assumed by the national child welfare committee of the American Legion.

"Increasing activity in child welfare work brought home to Legion officials the advisability of securing additional personnel to direct and supervise the work. To that end Miss Puschner was appointed field secretary of the Legion's child welfare committee," said Mr. McKee. "She will assist in setting up the Legion's child welfare field service."

Miss Puschner has been actively engaged in the work of the board of children's guardians at St. Louis since its creation in 1912. She has advanced from the position of secretary to the superintendent of the former St. Louis industrial school to agent of the board, doing the work of executive secretary of the board and director of the placing out department. She has handled several hundred adoptions in the juvenile court and has been legal representative of the board in all courts. She holds the degree of Bachelor of Laws and is a member of the American Association of Social Workers, of the National Conference of Social Workers and of various other professional bodies.

Miss Puschner is a member of the auxiliary of Quantico Roosevelt post of the American Legion at St. Louis.

Legion Men to Serve in Times of Emergencies

Formation of "Alamo Post Patrol of the American Legion," an organization of picked men trained for service in times of emergency and disaster, was announced by John K. Weber, commander of the American Legion post at San Antonio, Texas.

Commander Weber, commenting on the patrol, said: "The public has been educated to expect prompt and efficient service from the American Legion in emergencies. When the call came for aid during the 1921 flood, the Legion was among the first to be called on and first to respond. Our patrol will be fitted and capable of handling the most unusual circumstances."

"Units of the Legion have always done individual relief work in times of disaster, or have co-operated with other agencies in giving aid and relief. The latest instance of the Legion's activity in emergencies was their work done for the sufferers in the tornado-swept area of Illinois and Indiana. Thousands of refugees saved their valuable families because the Legionnaires protected against looters. Thousands of victims were clothed and others were fed through the agency of the Legion."

N. Y. Post Commander Is Twenty-Two Years Old

Herbert E. Whitley, commander of the American Legion post at Waverly, N. Y., is said to be the youngest post commander in the country. He is twenty-two years old.

Commander Whitley was only sixteen years old when he entered in the navy during the World war. One of his comrades in the post said of the young commander: "Whitley is the ideal commander we have ever had. He'll keep things moving from now on. We'll raise our quota of the Legion's \$25,000 endowment fund for disabled veterans and orphans with plenty to spare when that big round number of one million is reached."

CANTON

The baccalaureate sermon by the senior class of Canton high school was delivered Sunday at the Universalist church by Mr. Elmer Frazee, the pastor, who took for his subject, "Facing the Challenge of Life." The church was filled to overflowing and was prettily decorated with potted plants, the class motto, "Tonight we launch, where shall we anchor." A vocal solo, "The Lord is my strength," was rendered by Mr. Frazee, a vocal duet, "Hark, Hark My Soul," by Mr. Frazee and Miss Florence Sawyer and a solo, "Consider the Lilies," by Miss Sawyer. The graduation exercises will be held at the Opera House, Friday evening, there being sixteen graduates, seven girls and nine boys.

Miss Julia Small has returned from Farmington Normal School and with a friend, Miss Betty Bunker, are at Camp Mangan, Poland, for a week as delegates from the Y. W. C. A.

Robert Russell of Orono is visiting his grandparents, Mr. and Mrs. Milford A. Waite.

Mrs. Frederick Schaffer of Nantucket, Conn., is a guest of her sister, Mrs. Frank W. Morse and family.

The annual Sunday School supper of the Universalist church was held at the vestry Wednesday night with a good attendance. After the supper games were played and a social good time enjoyed. Glad Newman and bride of Auburn Miss Pauline Jordan of Mechanic Falls and the Misses Rosamond and Dorothy Newman, who arrived a short time ago from Beaumont, Manitoba, Canada, were Sunday guests of Mr. Newman's grandparents, Mr. and Mrs. W. A. Lucas. The Misses Newman are daughters of Mr. and Mrs. Henry Newman, who have resided in Canada for the past 16 years, but are now planning to locate at Mechanic Falls. They were former residents of Dixfield and well known in this vicinity.

Mr. and Mrs. Cleve Royal of Auburn have been guests of Mr. and Mrs. Ernest Glover the past week. While Mrs. Royal caught a salmon in the lake which weighed three pounds and ten ounces. Mrs. Abbott A. Russell of Poland has been a guest of her father, Isaac Lothrop.

Charles H. Gilbert, who has been in poor health for some time and suffered hemorrhages, has been taken to the Hebron sanatorium for treatment.

The Ladies Aid held an all day meeting Thursday with Mrs. Harry Taylor, Mrs. Arthur H. Ray has returned home from the hospital.

Mr. and Mrs. Elmer Lane and son and Mr. and Mrs. Wm. Jordan of West Peru have been guests of Mr. and Mrs. C. E. Richardson.

Mr. and Mrs. Fred Hutchinson and son of Hebron are in town to attend the high school graduation.

H. J. DeShon and family of Portland were in town last week. Mr. DeShon is suffering with catarrhs on his eyes. Mr. and Mrs. Herman Tirrell of Portland Springs were recent guests of his mother, A. L. Tirrell, and family.

Clinton Young caught a salmon in the lake last week which weighed 6 lbs. and 14 oz.

Mr. and Mrs. S. C. Jones recently celebrated their 54th wedding anniversary with a gathering of their children, grandchildren and great grandchildren at the old homestead. A picnic dinner was enjoyed under the huge shade trees on the lawn. Mr. and Mrs. Jones are in excellent health, though Mr. Jones is nearing his 92nd birthday.

Word has been received of the death of Prof. E. A. Daniels of Paris Hill. Mr. Daniels has been in poor health for some time. He was a former teacher in the Canton schools and married a Canton girl, Miss Viola Hayford, who survives, together with a son and daughter, Orland and Mary.

Frank Bicknell of Boston is visiting his parents, Mr. and Mrs. A. S. Bicknell, and family.

Dr. R. W. Bicknell and family of Wintthrop were visitors in town, Saturday. Miss Viola Tilley of Boston is visiting her mother, Mrs. Jennie H. Tilley.

Miss Edith Andrews is at home from the 1st of M. for the summer vacation.

Miss Ada Bonney has returned home from Saco. After a two weeks vacation she will go to the summer school at Bates.

Mrs. Mary Smith of Dixfield is spending a week with her daughter, Mrs. Chas. W. Walker.

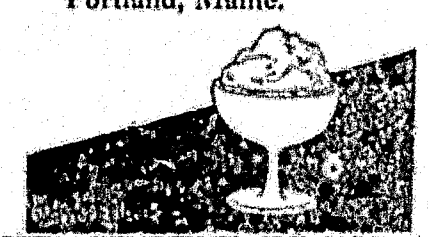

A banquet and entertainment was given the young people who have assisted in the music at the Universalist church the past year, with invited friends, Friday evening. Mr. Frazee was toastmaster and gave a good talk to the young people. Toasts were given and included in the entertainment were violin solos by Annas Bishop of Auburn and Robert Russell of Orono, vocal solo by Florence Sawyer and music by the high school orchestra. Games were also enjoyed.

DRUG stores and

sweet shops that sell S & H Ice Cream make the best sundaes and ice cream sodas you ever sat down to. They simply can't help creating master refreshments when aided by this remarkably smooth and deliciously flavored ice cream. Made with pure food ingredients by ice cream experts in a plant that's as "neat as wax."

Try S & H today. Take some home. Sold in bricks, bulk or cones wherever you see the S & H sign. Simmons & Hammond Mfg. Co., Portland, Maine.

National Forest Timber for Sale.

Sealed bids will be received by the Forest Supervisor, Gorham, N. H., up to and including July 11, 1925, for all the merchantable timber standing or down and all the live timber marked or designated for cutting on an area embracing about 537 acres in Wild River Working Circle, Compartment 6, Tracts 6P, 6L, 6M, 6N, 6O, on the watershed of Mitchell Branch of the West Branch of Pleasant River, 3 miles southwest of Mason, Oxford County, Maine, estimated to be 632 cords more or less of white birch, 125,000 cubic feet more or less of yellow birch, beech, hard and soft maple, poplar and ash and 17,000 cubic feet more or less of spruce, fir and hemlock. No bid of less than \$1.00 per cord for white birch, \$1.50 per 100 cubic feet for yellow birch, beech, poplar, hard and soft maple, \$1.50 per 100 cubic feet for ash and \$2.00 per 100 cubic feet for spruce, fir and hemlock will be considered. Deposit with bid \$300.00. The right to reject any and all bids reserved. Before bids are submitted, full information concerning the timber, the conditions of sale, and the submission of bids should be obtained from the Forest Supervisor, Gorham, New Hampshire.

SYNOPSIS

CHAPTER I—Introducing (Orra DeLong) in his infancy mother, Selma DeLong, a simple, peace-loving, and of fortune. Her life, to you head in Chicago in 1888, had generally enjoyable. At the age of 10, she was killed in a quarrel that had been started by a girl named Selma, a nineteen-year-old, practically destitute, become teacher.

A slow-dawning film of over the blue of Kiana To this film spread almost so that it fluted his broad nose and widened his full lips, regaining his massive shoulder the round belly, so that all from his eyes to his waist, pling and shaking with slow heavy Dutch mirth.

"Cabbages is beautiful!" pop eyes staring at her in a gleam. "Cabbages is beautiful!" silent laughter now rose and audible in a rich throaty clasp was plain that laughter, we pool, was not a thing to be missed, once raised. "Cabbages" choked a little, and spluttered.

Selma laughed, too, even, protected his laughter. "Cabbages" insisted, "Why not? Life is long and Burgundy like—uh—like—what's that chrysoprane and porphyry, deities of cabbages and the the best-tops together look like patches?"

Which was, certainly, no new school teacher to talk land truck gardeners driving along the dirt road on his way. Prattle. But then, Selma, had read Byron at seventeen.

Kiana Pool knew nothing soprano and porphyry. Nor a Nor, for that matter, of jade gandy. But he did know a both green and red. He knew from seed to suetcrust; he knew varieties from the study book to the early Wakened that they were beautiful; he looked like jewels; that they Persian patches, had never been head, and rightly. What head of a cabbage, or for that of a robust, soil-stained, tolling truck farmer to do with none chrysoprane, with jade, with B with Persian patterns?

The horses clapped down the country road. Now and again beside Selma was agitated all before. And from between the fozz of stubble heard she would "Cabbages! Cabbages!"—did not feel offended. She had been offended at anything. For in spite of her recent tragical sixteen years, her loneliness, rifting thought of this new life which she was going, among it she was conscious of a warm relation, of excitement—of adventure. That was it. "The whole thing was a grand adventure," Selma said. Selma gave a little bit anticipation. She was doing a literary and daring thing; a thing the Vermont and now, fortunate, accessible Peaske would have with horror. For equipment a youth, curiously, a steel-strong one brown lady's-cloth, one washers; four hundred and seven dollars; and a gay, adventurous spirit that was never tamed. It led her into curious and also often found, at the end a trackless waste from which to extract her story, patiently always, to her, red and green calico to be jade and Burgundy. Cabbages and porphyry. Life is a woman against a woman life.

Kiana Pool was a school of she was to live at his house. He should not have said that she cabbages. So now she drew her pling and tried to appear the teacher, and succeeded in looking like a white pansy.

"Atten!" (or nearly that). "Have three children, haven't you?" They'll all be my pupils!" Kiana Pool ruminated on this concentrated so that a night, she should not have said that she cabbages. So now she drew her pling and tried to appear the teacher, and succeeded in looking like a white pansy.

"I have got three children. All not be your pupils?" There was a thing said, unobtainable in his del of this.

"I am not. Why not? Which not. To tell me which one will which one was?"

MAINE WEEKLY INDUSTRIAL REVIEW

Portland—Maine Central railroad to put feet of large motor buses into operation on some of its branch lines.

Bangor—Farrar Parvane Co. buys Pickering building at Main and Middle streets.

Augusta—Highway map of Maine will be available in a few weeks.

Barnstable—New \$25,000 theatre opened.

Portland—Immanuel Baptist church buys \$20,000 site.

Warren—Repairs on Tiger engine halt completed; new chemical truck to be installed soon.

Bethel—New high school under discussion.

Houlton—Contract awarded for construction of boundary line road.

Portland—New fire alarm and red light installed at Central fire station.

Portland—Resumption of boat service from here outward under consideration.

Augusta—Bids opened for construction of eighteen room hotel, kitchen, store room and other buildings at Camp Keegan.

Portland—\$20,000 improvements at Union station contemplated by Portland Terminal Co., Cumberland County Power and Light Co., and City.

Guilford—Fire company buys 1,000 feet of hose.

Canaan—Contracts let for construction of new high school.

Bangor—Conference to be held to discuss utilization of Maine hardwood.

Bethel—Highway between here and Thomaston suggested, to cost \$100,000.

Portland—75,000 salmon planted in Lake Sebago waters.

Calden—Eastern pulp wood company repairing and building former tugboat wharf.

Bethel—Work progressing rapidly on Memorial memorial.

WEST GREENWOOD

Miss Dean of Bethel spent Friday with Miss Heath.

Don Smith and Mrs. Grover were in this vicinity Thursday.

Acme Cross called on Miss Parkwell Friday evening.

Miss Heath finished her term of school and has returned home.

Mrs. Conner and family were in Bethel one evening last week.

Mrs. Ingalls of Berlin called on her mother last week.

Frank Sloan and Mrs. Bennett called on Mrs. Chase, Saturday.

Mrs. and Mrs. Shaw went to Bangor for a few days recently.

Mary Gull of Massachusetts spent a few days recently with her brother, John Gull and family.

Nellie Harrington is home from Canada.

Mrs. Campbell of Oxbow spent a few days with her mother, Mrs. Chase, recently.

Mr. Planders and Mr. Kimball are working for Betts and Harrington.

Mrs. Davidson of Bangor is spending a few weeks with her daughter, Mrs. Gull.

ALBANY

Sunday, June 21st, was a day of unusual interest in the little church at Hunt's Corner, Albany, of which Mrs. Howard Iron, of Portland, is pastor.

A large congregation, including many from surrounding towns, gathered to greet a friend and layman resident of Albany, who was the preacher of the morning.

Mrs. Iron conducted the service and introduced the speaker, Rev. George H. Wilbur, of Reed River, Oregon, who preached an impressive sermon on the subject, "Hiding from God."

Mrs. Wilbur and Mr. E. H. Renwick, of St. Petersburg, Florida, both subjects of merit, rendered several selections during the service.

SOUTH ALBANY

Mr. and Mrs. Ernest E. Cross from Portland and Mr. and Mrs. Charles Judkins from Bangor were Sunday guests at James Kimball and family.

Harold McMillan was sick Friday. Dr. Hubbard was called in attendance.

Mr. and Mrs. Ray O. Wardwell and Mr. E. O. Durbin were in South Paris last week Thursday.

Miss Marian Frost, Miss Vera Kimball and Mr. C. E. McMillan called at James Kimball's Sunday.

James Kimball and Len Durbin are working at Bangor's M. C.

Don Kimball is working for Frank Brown.

Mr. L. A. Brooks happened on spending a few weeks at Bangor's M. C.

Mr. and Mrs. W. A. McKee and daughter Ann Laura and Mrs. Lucy Kimball called at J. A. Kimball's Saturday evening.

Value of Maine crops for 1924 detailed \$14,000,000, according to report of State Department of Agriculture.

The United States Department of Agriculture in Farmers Bulletin No. 1130 gives an account of the various methods for developing power for farm use and household consumption. Refrigeration on the farm, produced by electricity with the use of the greatest steps heretofore taken in the use of electricity for farm use, is the subject of Bulletin No. 1130, upon request to Dept. of Agriculture, Washington.

The Ladies' Aid sale, supper and entertainment which was held last Saturday was a good success from every standpoint.

A Ladies' Aid supper all ways is and the entertainment was very entertaining. About \$100 was realized for the treasury of the society.

Professor Dale, political economist for the State University of Idaho, is of the opinion that, for the first time since he came to Idaho six years ago, there is an air of genuine optimism in that part of the state as to present conditions and future prospects.

It is safe to say that the feeling in Idaho is justly what the feeling all over the nation.

Reconstruction road program for Maine this year involves \$700,000.

State's annual production of sweet corn for canning is 500,000 cases of 24 cans each.

Maine employs 12,000 people in pulp and paper industry. 12,000 in cotton manufacture, 11,000 in lumber industry, 10,000 in boots and shoes, and 9,000 in woolen industry.

Maine has 2,922 miles of steam railway, 518 of electric, 36,000 of highway and 1,100 of hard-surfaced state and federal highway.

The six New England States and the included counties and municipalities will expend approximately \$17,700,000 in improvement programs mapped out for the coming year, according to survey by the United States Employment Service.

NOTICE OF FORECLOSURE

Whereas Harry H. King and Sarah A. King, both of Bethel, County of Oxford, State of Maine, by their mortgage deed dated June 21st, 1921, and recorded in Oxford County Registry of Deeds, book 237, page 7, conveyed to me, the undersigned, a certain parcel of real estate situated in Albany in said County, on the easterly side of Bangs Pond, as called, and bounded as follows: begin-ning on the shore of said Pond at a point one hundred and sixteen feet easterly from the wharf which is built into said Pond directly in front of the Main Cottage, thence south along the shore of said Pond, thence in a direct line one hundred and sixty feet to the line of land of George J. Haggard, said land supposed to run along a water fence on either side as it stood on said June 21st, 1921; thence in a southerly or southwesterly direction on line of land of said Haggard to a branch of maple trees on the shore of said Pond, thence in a generally southerly direction along the shore of said Pond to the point of beginning. Being the same parcel conveyed by William J. Upson to Sarah A. King on said 21st day of June, 1921; and whereas the conditions of said mortgage have been broken.

Now, therefore, by reason of a breach of the conditions thereof, I, John A. Chapman, do hereby foreclose.

Dated June 23rd, 1926.

J. A. CHAPMAN.

IT HAS LASTED

Bethel People Must Believe Such Convincing Testimony as Mrs. Bartlett's

No one in Bethel who suffers backache, headaches, dizziness, rheumatic pains or distressing urinary ills can afford to ignore this twice-told story of a Bethel resident. It is confirmed testimony, telling of lasting benefit from Doan's Pills—a stimulant diuretic to the kidneys. It's evidence that no man or woman in Bethel can doubt.

Mrs. Walter E. Bartlett, Chapman St., says: "I used Doan's Pills and the results I received were in every way, satisfactory and were evidence of the merit of this remedy. I have felt no recurrence of kidney complaint."

OVER FOUR YEARS LATER, Mrs. Bartlett added: "Doan's Pills cured me of kidney trouble and the cure has been permanent."

Mrs. Bartlett is only one of many Bethel people who have gratefully endorsed Doan's Pills. If your back aches—if your kidneys bother you, don't simply ask for a kidney remedy—ask distinctly for DOAN'S PILLS, the same that Mrs. Bartlett had—the remedy backed by home testimony. 50 cents at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

MAINE, THE LAND OF REMEMBERED VACATIONS

The first of the series of booklets which the State is publishing from the appropriation made by the Legislature last winter, has just come off the press and is now being distributed by the State of Maine Publicity Bureau and through various other channels.

The booklet contains sixty-eight pages full of detailed and comprehensive information concerning the State and is unquestionably one of the best that has ever been issued advertising the State of Maine.

The front and back covers are titled "Maine, the Land of Remembered Vacations." The front cover shows a seacoast scene and is given the official atmosphere by having the State Seal in the lower left hand corner. The back cover shows an inland lake scene, with mountains in the background.

On the first inside page is an illustrated map showing in caricature the various forms of recreation and amusement that are open to the summer tourist. This page is unique in itself and is one of the best illustrations of its kind that has ever appeared. This page is titled, "Maine the Summer Playground of the Nation."

On page two, is a layout of the book telling what it contains and on page 3 is the message "Maine Invites You," with a story of the State's manifold attractions. At the foot of the page is a statement that further information regarding the agricultural and industrial opportunities of the state will be supplied on request by the Information Bureau, Secretary of the State at Augusta.

The general text matter in the book not only contains the information that the previous booklet "Maine Vacationland the Year Round" contained, which was prepared by Harrie B. Cox, General Secretary of the State of Maine Publicity Bureau in collaboration with Arthur G. Staples of the Lewiston Journal, a member of the Bureau's Publicity Committee, but has many additional features. The general layout of the book was made by H. K. McCann Advertising Agency in New York City, which is handling the State advertising.

The booklet describes the various resort sections of the State, and is divided into three parts. Pages one to twenty-four are devoted to seacoast, pages twenty-four to forty-eight to the in-

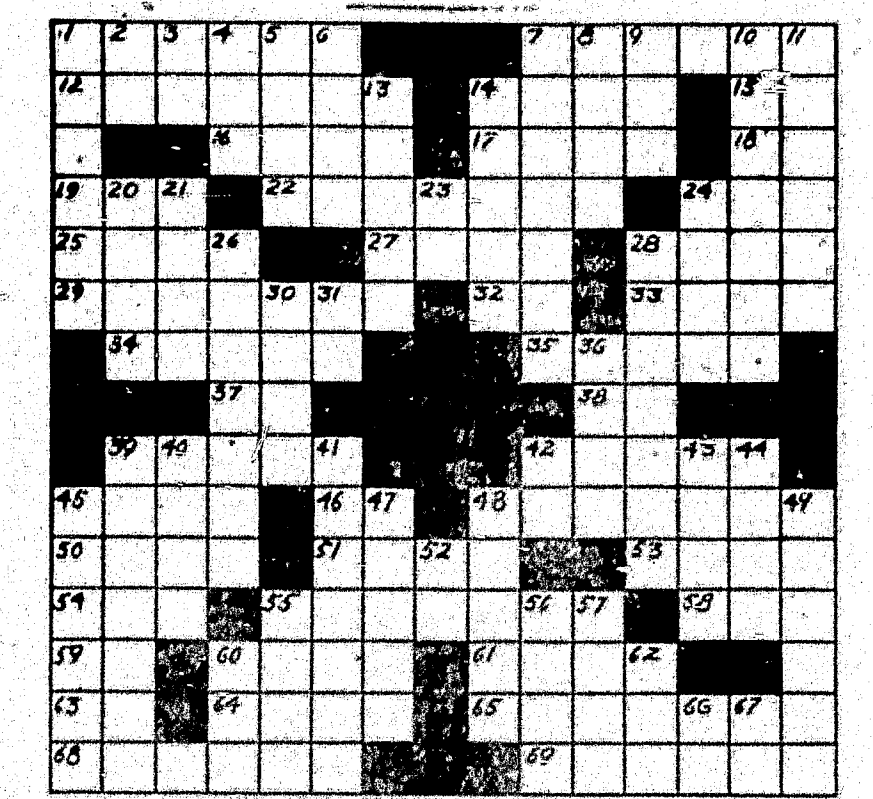

terior lake country, with the exception of the two center pages which are devoted to a map. This map is one of the most unique yet issued, and the explanation thereon states that it has been prepared only to enable the readers of the booklet to locate the cities and towns of the State.

All map details, such as highways, transportation lines, etc. have been omitted so as to avoid confusion. In order that the places on the map may be quickly located by the stranger, it has a side index of letters, and a top and bottom index of numbers and the key to the map is printed in the back of the book.

The balance of the booklet from pages fifty to sixty-seven is devoted to "Boys' and Girls' Camps," various phases of "Camping Out," "Winter Sports," "Hay Fever Information," "Maine Industrially," "Maine Agriculturally," "Where to Stay in Maine," and an index. The booklet is profusely illustrated with over 100 halftone cuts.

The booklet was printed by the Lewiston Journal Print Shop, Lewiston. Copies in quantity for general distribution may be obtained through Joseph

Save Money

when you buy "L.F.'s"

or "L. F." ATWOOD Medicine.

"L.F." because it's such a big bottle (almost 3 ounces) and such a small dose (usually a tea-spoonful) of the concentrated extract of the best and purest medicine and the price is only 50 cents.

Next, because when you use it, you ward off sickness in the form of headache, dizziness, nausea or constipation, and are able to attend to your work regularly, without losing your pay.

Finally, when you are feeling fine as a result of the "L.F." treatment, with better digestion, you do more, do it quicker, better, and easier, and with that feeling of satisfaction which money can not buy.

I cent a dose
